Education

National University of Singapore

Aug 2020 – Jul 2024

Bachelor of Computing in Computer Science, Honours (Distinction)

- **Relevant Coursework:** Software Engineering Principles and Patterns, Software Testing, Database Systems Implementation, Big Data Systems for Data Science, Cloud Computing, Parallel Computing

Experience

Software Engineer, Anacle Systems Limited – Singapore

Aug 2024 – Present

- Engineered and maintained an enterprise real estate management application for Singapore's housing authority using C#, ASP.NET, and SQL Server, supporting critical financial and operational workflows
- Optimized SQL queries for financial reporting, boosting query performance by 90% and cutting execution time from 8 minutes to 10 seconds across 300K+ records
- Managed and delivered a client change request valued at over \$10,000, coordinating requirements, implementation, and testing to ensure on-time delivery

Full Stack Developer (Internship), Bank of New York Mellon – Singapore

Jun 2023 – Aug 2023

- Built and delivered a full-stack presentation-creation application using Angular, Python, MongoDB, and Amazon S3, enabling the Innovation Team to showcase products across 5 device types and screen sizes

Software Engineer (Internship), Integro Technologies – Singapore

Jan 2023 – Jun 2023

- Diagnosed and resolved 30+ technical bugs in a Java-based enterprise banking application, improving system stability and reliability
- Containerized and deployed the application to an OpenShift cluster, integrating microservices, logging, tracing, and monitoring components to strengthen production observability

Awards & Achievements

Hack4Good Finalist (Top 10), NUS Google Developer Student Club

Feb 2024

devpost.com/software/green-action-jbr2uh

- Designed and prototyped a gamified volunteer-tracking and data-visualization platform for the Ground-Up Initiative organization using React, Shadcn/ui, Tailwind CSS, Node.js, Supabase, and Clerk, advancing to the top 10 finalist round

Projects

PocketPortfolio: github.com/pbthang/cs5224-project

- Led a 4-person team to design and launch a platform that streamlined the creation and deployment of portfolio webpages, leveraging OpenAI and AWS (Lambda, API Gateway, S3, CloudFront, Serverless, CloudFormation, and Amplify)

PeerPrep: github.com/CS3219-AY2223S1/cs3219-project-ay2223s1-g31

- Collaborated within a 4-person Agile team to architect and build a microservice-based, real-time pair-programming platform for coding interview practice, using React, Node.js, MongoDB, SQLite, Redis, Socket.io, and Docker

Portfolio Website: github.com/pbthang/Portfolio

- Built and deployed a personal portfolio site with Astro.js, Tailwind CSS, daisyUI, Three.js, and Contentful CMS as a server-rendered serverless application on Netlify
- Improved SEO and accessibility by implementing effective meta tags, a sitemap, and WCAG-compliant design, achieving a Lighthouse score of 95 for accessibility and 100 for SEO

Go Messaging Backend Application: github.com/pbthang/go_messaging_app

- Architected and prototyped a microservice backend for message delivery using Go, Kitec RPC, Redis, and Docker
- Built a CI/CD pipeline with GitHub Actions to automate testing and containerization
- Deployed and orchestrated the application on a local Kubernetes cluster

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C#, HTML, CSS

Technologies: React, Next.js, Node.js, Express.js, FastAPI, ASP.NET

Databases: PostgreSQL, SQL Server, MongoDB, Redis, Firebase, Supabase

Others: Git, GitHub, GitLab, CI/CD, Docker, AWS, Claude Code
